## (54) MICROSCOPE

## (57)Abstract:

**PROBLEM TO BE SOLVED:** To improve the operability of the variable power operation and focusing operation (focusing) of a microscope.

**SOLUTION:** A main body H of the microscope is provided with a variable power knob 7 capable of changing an observation magnification by rotationally operating this knob and a fine adjustment focusing knob 11 movable by focusing adjustment by rotationally operating on a common revolving shaft. An observer is able to easily alternately and repetitively manually operating the variable power knob 7 and the fine adjustment focusing knob 11. The moving quantity of the hand in alternately carrying out the variable power operation and the focusing operation is decreased.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
